

BCM Regulatory Compliance Assessment – A Challenge for Today’s Organizations

In Saudi Arabia’s evolving regulatory landscape, achieving and maintaining Business Continuity Management (BCM) compliance has become more than a best practice — it’s a regulatory obligation and not easy to demonstrate readiness, resilience, and adherence maintaining compliance with various BCM requirements such as:

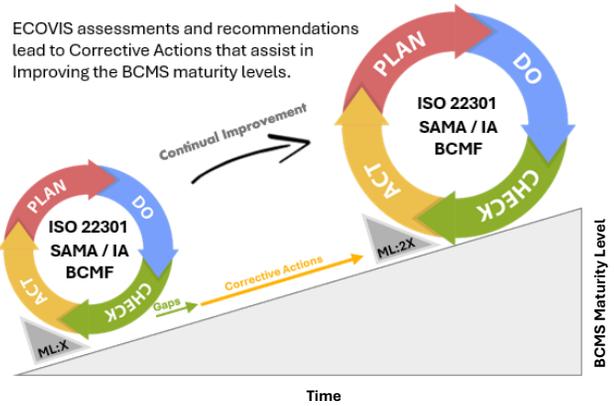

- Saudi Arabian Monetary Authority (SAMA)
- Insurance Authority (IA)
- Digital Government Authority (DGA)
- Capital Market Authority (CMA) & Tadawul
- National Cybersecurity Authority (NCA)
- Comm. Space & Technology Commission (CST)

ECOVIS Quick BCM Preparedness Diagnostics – First Step towards Improvement and Resilience

Whether you’re preparing for a regulatory compliance audit, seeking an independent review of your BCM framework, or simply aiming to validate organizational readiness, our Quick BCM Preparedness Diagnostic Service provides a fast, structured, and insightful evaluation of your BCM posture. Our experts' recommendations help you close compliance gaps, strengthen resilience, and align swiftly with regulatory and ISO 22301 requirements.

Our Assessment Model

Designed by ECOVIS experts, our Quick BCM Preparedness Diagnostics Model simplifies BCM for organizations, delivers quick-wins and sets a clear path toward continual improvement in the resilience posture.

- Our comprehensive assessments highlight:
- Identification of key risk and control gaps.
 - Alignment with regulatory frameworks / ISO 22301 requirements.
 - Actionable improvement roadmap to achieve compliance and resilience.

BCM Quick Preparedness Diagnostics - Service Model
